12 published books	xxxii
List of 10 volumes remaining to be published	xxxiv
Overview of Book	2
Something Out Of Nothing	3
I. The Development of Zero	12
II. General Notion of the Zero Exponent	13
III. The Zero Exponent in the Semantic Disciplines	14
IV. The Zero Exponent in the Empirical Sciences.....	16
Notes	21
Three Semantic Exercises: "Time," "Quality," And "God"	23

I. Two Views of Time.....	24
II. Two Views of Quality	25
III. Two Views of God.....	27
Notes	31
Operational Definitions Operationally Defined.....	33
Abstract.....	33
Notes	41
Testing Message Diffusion: Recall of Verbal and Graphic Symbols.....	43
I. The Test Situation.....	44
II. Message Recall at Successive Test Periods	46
III. The Mechanics of Exposure: Seeing or Hearing the Message from One or Two Sources	46
IV. Test-Re-test Differences in Message Recall	47
V. Conclusions	49
Notes	51
The Pollster and the Professor.....	53
Science and Scholasticism – A Dissenter's Opinion	54
A Rejoinder to Mr. Kessler	55
The Theory of Factors, I.....	57
References	73
Notes	75
The Theory of Factors, II.....	77
Summary	87
References	88
Notes	89
On The Sampling Theory of Intelligence	91
I. The Problem	92
II. The Facts to Be Explained.....	92
A. Normality.....	92
B. Range	93
C. Positive Intercorrelations.....	93
D. Equiproportion.....	93
E. Hierarchy.....	93
III. The e Hypothesis.....	93
A. The Three Assumptions.....	93
B. A Model Mechanism.....	94
IV. The Consequences	95
A. To x.....	95
B. To g.....	96
C. To n.....	96
D. To rxg.....	98
E. To rxy	98
F. To F.....	99
V. Verification Procedure	100
VI. Thomson's Two Forms of the Hypothesis.....	101
A. Dice Structures.....	101

B. Thomson's Correlation of Sampling Errors Hypothesis.....	101
VII. A Further Feature of Interchangeable Elements	102
A. The Fourth Assumption.....	102
B. Experimental Investigations	103
VIII. Interpretations	105
IX. Summary.....	107
Notes	109
On Measuring Languages.....	113
I. Criteria for a "Best" Language	114
II. The Familiarity Criterion.....	114
III. The Excellence Criteria.....	115
A. A world language should be idiomless.....	115
B. A world language should have the order of the words in its sentences obey the rules without exception.	116
C. A world language should have words which are uninflected.....	117
D. A world language should be phonetic in spelling.	118
E. A world language should have words which are univocal in meaning.....	118
F. The world language should have uniform pronunciation everywhere.....	119
G. A world language should have every letter unique in shape and sound.....	120
IV. The Purpose of the Criteria	121
Notes	123
On Percentage Moments	125
Notes	131
Word Scales for Degrees of Opinion.....	133
I. Assumptions and Intent of this Study.....	134
II. Procedures for Scaling Phrases of Degree.....	135
A. The Variables in Scaling	135
B. The Criteria or Rules for Scaling.....	136
C. The Context in Scaling.....	137
III. Findings of Scale Positions and Ambiguities	138
A. Out of Context.....	138
B. In-series Context.....	141
C. With Pro-con Content and In-series Context	143
D. In Positive or Negative Context	144
IV. Word Scales Recommended for Polls.....	145
References	147
Notes	149
Why Not Scientific Method in Philosophy?.....	151
Products Predict Interaction Where Sums Do Not	157
I. Sums or Products: Plurals or Groups?	158
II. Some Experimental Evidence.....	160
A. Interaction of People thru Space - the case of intercity telephoning	160
B. Interaction of People thru Time - the case of logistic message diffusion.....	161
C. Interaction in a Group vs. Action in a Plural.....	163
D. Other Testings	163
III. Remedial Criteria	164

A. The "Cross-Classifying" Test of Interaction	164
B. The "Vanishing Result" Test.....	168
IV: Summary	169
Notes	171
Appendix.....	173
A Theory for the Measurement of Some Social Forces.....	175
I. Basic Concepts	176
A. Time	176
B. Population	176
C. "Indicia"	176
1. Compound Concepts	177
2. Social Change.....	177
3. Velocity.....	177
4. Acceleration	177
5. Population-change	178
6. Momentum	178
7. Force.....	178
8. Probable Errors	179
9. Diversity of the Indicia	179
II. Resisting Forces and Other Auxiliary Concepts.....	180
1. Newton's Laws of Motion	181
Notes	183
Analyses of the Interrelation Matrix by Its Surface and Structure.....	185
I. Introduction	186
II. The Surface of the Matrix.....	187
III. The Party Structure of the Matrix	188
A. Actual vs. Possible Group Structures.....	191
B. Grouping	191
C. Other special conditions.....	191
Notes	193
Induction, Deduction, and Causation.....	195
I. Induction	196
II. Deduction.....	201
III. Causation.....	206
Notes	213
A Dimensional Theory of Groups	219
Notes	225
All-Or-None Elements and Mathematical Models for Sociologists	227
I. Matching Models and Data	228
II. Uses of Binary Elements.....	229
III. Some Social Conditions in Binary Models	231
IV. Some Mathematical Conditions in Binary Models.....	235
V. Manufacturing Socially Desired Distributions	240
VI. Summary	241
Notes	243
Dimensional Analysis in Social Physics	245

Abstract	245
I. Intentions of This Paper	246
II. A Semantic Theory of Dimensional Analysis	246
III. Dimensional Analysis in Physics	246
IV. Dimensional Analysis in the Social Sciences	247
A. Statistical Moments as Dimensional Formulas	247
B. The Basic Social Dimensions	247
C. The Basic Power of the Social Dimensions	249
D. The Zero Exponent	251
V. Application to Demographic Gravitation	252
A. Dimensional Derivation of the Gravitation Formula	252
B. 27 Tests of the Formula	253
VI. Application to New Research	255
A. Diffusion of a Rumor	255
B. Step 1 - Qualitative Analysis	256
C. Step 2 - Quantitative Analysis	256
D. Step 3 - Relative Analysis	256
E. Step 4 - Systemic Analysis	258
VII. Bibliography	259
Notes	261
Physical Dimensions of Social Distance	265
I. Social Distance and Geographic Distance	266
II. Social Distance and Group Sizes	267
III. Social distance and time	268
IV. Social Distance, Geographic Distance, Group Size, and Time	268
Notes	271
The Reiteration Rule	273
I. The Problem – Can syntax be systematized as reiterative behavior?	274
II. The Definitions – The reiterative terms in the "semimatrix"	274
A. The Four Semiocycles	274
1. Semiocycle $\bar{0}$ defining Sets	274
2. Semiocycle I defining Sums	274
3. Semiocycle II defining Products	275
4. Semiocycle III defining Powers	275
5. The Reiteration Rule defined for any Cycle	275
B. The Components of Each Semiocycle	276
1. Inverse Reiteration defined	276
2. The Suboperations (i.e., "Iterating" and "Reitering") defined	276
C. The Compounds of the Semiocycles	276
1. The Pair Semimatrix	277
2. The General Semimatrix	277
3. Variant Iterands	278
III. The Hypotheses – as to contents, causes, and consequences of reiterations	278
A. The Analytic Hypotheses – as to syntax	278
B. The Generative Hypotheses – as to neural basis	279
C. The Synthetic Hypotheses – as to all laws	279

IV. The Testing – to date and ahead for the three types of hypotheses	279
A. Hypotheses as to Syntax.....	279
1. Syntax in Language	280
2. Syntax in Logic.....	281
3. Syntax in Statistics	281
4. Syntax in Sociology	281
5. Syntax in Information Theory (9).....	281
B. Hypotheses as to Neurograms.....	282
C. Hypotheses as to All Laws	283
V. Summary – The reiteration rule systematized	285
Appendix on Formulas	289
References	291
Notes	293
Tilp: A Ten Letter Alphabet of Meanings	295
I. Linguistic Analysis.....	296
II. A Ten Letter Alphabet of Meanings ¹	296
III. Ten Dimensions of Language	298
IV. Some Spatial Terms	303
V. Some Kinship Terms	304
VI. Grammar Complete in Ten Rules	304
VII. Quantic Classification of Grammatical Parts of Speech	305
VIII. A Sample Paragraph in TILP	306
IX. Limitations and Possibilities of TILP	307
Notes	311
Model English*	313
Notes	325
Abstract of S – Theory.....	327
I. Brief Statement of the Theory	328
A. Definition	328
B. The Quantic Number and Classification	328
C. A Geometric Interpretation	329
II. Possible Utility of the Theory	329
A. Precision	329
B. Parsimony	329
C. Classification.....	329
D. Pregnancy.....	330
III. Verification of the Theory	330
A. Internal Consistency.....	330
B. Correspondence to External Observation	330
IV. Invitation of Criticism	330
Sample Analyses	331
A Sample Analysis.....	332
Another Sample Analysis	334

Overview of Book

This book was originally intended to be one of a set of four themed volumes covering the life's work of Dr. Dodd for publication by an academic publisher around 1970. Unfortunately, the project was cancelled. This is volume 1 of Dodd's papers on Interactive Symbolizing.
